

Artisan Emerging Markets Debt Opportunities Fund

QUARTERLY
Fact Sheet

Institutional Class: APHOX

As of 31 December 2024

This material must be preceded or accompanied by a current Artisan Partners Funds prospectus. [View a prospectus or summary prospectus.](#)

Investment Process Highlights

The team applies in-depth fundamental research and employs robust operational capabilities across a broad opportunity set to uncover knowledge gaps in global markets. By exploiting knowledge gaps, the team is well positioned to discover idiosyncratic opportunities that provide compelling risk-adjusted return potential.

Organizational Structure

- Flat and collaborative structure
- Portfolio managers and analysts focus on idea generation
- Trading and implementation are embedded within the investment team

Idea Generation Through Broad Investment Universe

- Constantly perform fundamental country research and monitor financial markets
- Country research seeks to understand policy environment and how important policy moments may alter the investment environment
- Corporate analysis includes decomposing yields and examining corporate liquidity and solvency risks
- Integrated environmental, social and governance (ESG) analysis at the country and corporate levels
- Broad spectrum of global markets with investable assets from more than 100 countries across asset classes

Portfolio Implementation

- Investment opportunities analyzed from a risk factor perspective—the forces that drive securities and instruments prices
- Investment team and trading consider which instruments provide optimal risk-adjusted return
- Trading and implementation expands the investment universe by understanding and overcoming investment barriers

Portfolio Details

	APHOX	
Net Asset Value (NAV)	\$10.18	
Inception	7 April 2022	
30-Day SEC Yield (%) [*]	7.00/7.23	
Expense Ratios	Gross	Net ¹
Annual Report 30 Sep 2024 ^{2,3}	1.64%	1.13%
Prospectus 30 Sep 2023 ³	1.97%	1.13%
Total Net Assets (Millions)	\$80	

^{*}Unsubsidized/subsidized. ¹Net expenses reflect a contractual expense limitation agreement in effect through 31 Jan 2026. ²Includes interest expense and dividend payments for securities sold short. ³See prospectus for further details.

Portfolio Statistics

Yield to Worst	12.57%
Effective Duration (yrs)	2.68
Spread Duration (yrs)	2.35
IG/HY/Not Rated Composition (%)	27/60/13
Number of Issuers ¹	85

Source: Artisan Partners. Based on market value of the total portfolio, including cash and cash equivalents. ¹Equals the number of risk positions, defined by the investment team as the number of emerging markets sovereign and corporate issuers to which the portfolio is exposed directly or via derivative instrument (treating hard currency credit and interest rates exposures distinctly), as well as the number of emerging markets currencies to which the portfolio is exposed.

Asset Types (%)

Sovereign Credit ¹	45.59
Corporate Credit ¹	13.65
FX Exposure ²	48.16

¹Reflects credit positions payable in hard currencies, including notional exposure of derivative positions. ²Reflects aggregate net exposure to currencies other than hard currencies. Market value of derivative positions are included.

Investment Results (%)

As of 31 December 2024	QTD	YTD	Average Annual Total Returns

Past performance does not guarantee and is not a reliable indicator of future results. Investment returns and principal values will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown. Call 800.399.1770 for current to most recent month-end performance. The performance information shown does not reflect the deduction of a 2% redemption fee on shares held by an investor for 90 days or less and, if reflected, the fee would reduce the performance quoted.

Top 5 Emerging Markets Currency Exposures (%)

Brazil	7.6
Indonesia	6.9
Turkey	5.8
Peru	4.3
Dominican Republic	4.0
TOTAL	28.6%

Reflects the aggregate net exposure from securities and other instruments issued in local currencies, other than hard currencies. Market value of derivative positions are included.

Top 5 Emerging Markets Interest Rate Exposures by Country (years)

Indonesia	0.60
Czech Republic	0.56
Peru	0.43
Mexico	0.39
India	0.29
TOTAL	2.27

Reflects the duration contribution from aggregated securities and other instruments issued in local currencies. Excludes short-term currency forwards and hard currency denominated instruments.

Top 5 Credit Exposures by Country (%)

Bahamas	6.8
Iraq	4.5
Colombia	4.1
Benin	3.5
Brazil	3.0
TOTAL	21.9%

Reflects the country of domicile for aggregated portfolio securities denominated in hard currencies.

Currency Exposures by Region (%)

Asia	7.8
Developed Markets	—
Eastern Europe	16.3
LATAM	19.1
MENA	3.0
Sub-Saharan Africa	1.9
TOTAL	48.2%

Reflects exposures from positions denominated in regional currencies, other than hard currency exposures. Market value of derivative positions are included.

Credit Exposures by Region (%)

Asia	4.0
Developed Markets	0.2
Eastern Europe	10.3
LATAM	17.6
MENA	7.8
Sub-Saharan Africa	19.3
TOTAL	59.2%

Reflects exposures for regionally domiciled positions denominated in hard currencies, including notional value of related derivatives.

Carefully consider the Fund's investment objective, risks and charges and expenses. This and other important information is contained in the Fund's prospectus and summary prospectus, which can be obtained by calling 800.399.1770. Read carefully before investing.

Current and future portfolio holdings are subject to risk. The value of portfolio securities selected by the investment team may rise or fall in response to company, market, economic, political, regulatory or other news, at times greater than the market or benchmark index. A portfolio's environmental, social and governance ("ESG") considerations may limit the investment opportunities available and, as a result, the portfolio may forgo certain investment opportunities and underperform portfolios that do not consider ESG factors. Non-diversified portfolios may invest larger portions of assets in securities of a smaller number of issuers and performance of a single issuer may have a greater impact to the portfolio's returns. International investments involve special risks, including currency fluctuation, lower liquidity, different accounting methods and economic and political systems, and higher transaction costs. These risks typically are greater in emerging and less developed markets, including frontier markets, and include new and rapidly changing political and economic structures, which may cause instability; underdeveloped securities markets; and higher likelihood of high levels of inflation, deflation or currency devaluations. Fixed income securities carry interest rate risk and credit risk for both the issuer and counterparty and investors may lose principal value. In general, when interest rates rise, fixed income values fall. High yield securities (junk bonds) are speculative, experience greater price volatility and have a higher degree of credit and liquidity risk than bonds with a higher credit rating. Use of derivatives may create investment leverage and increase the likelihood of volatility and risk of loss in excess of the amount invested.

The portfolio exposures presented exclude US Treasuries, US dollars and euros and US dollar/euro-denominated derivatives and cash equivalents, unless otherwise noted. In aggregate, these instruments make up a material portion of the portfolio's exposures and may be impactful to the portfolio's return, but are typically utilized for liquidity management and reflect negative exposures due to currency offsets when funding positions in emerging markets. Hard currencies are defined by the investment team to include currencies of developed market countries, including US dollars, euros, British pounds and Japanese yen, among others.

Unless otherwise indicated: the portfolio data and performance source is Artisan Partners; all information in this report includes all classes of shares, except performance, SEC Yield and expense ratio information; and information as of the date shown in the upper right hand corner, is subject to change and may vary from the official books and records of the Fund. Where applicable, portfolio statistics include accrued interest, and exposure percentages are based on the Fund's total net assets. Totals may not sum to 100% due to rounding, derivative exposures, unsettled transactions and other factors.

Notional value adjusts for derivatives' exposures to the market value of a contract's underlying security, rather than the market value of the contract itself, and represents an approximation of the portfolio's economic and risk exposures at a point in time. Delta measures the sensitivity of a derivative contract to changes in price of its underlying security; the derivatives contract's value may be overstated or understated without delta-adjustment.

The J.P. Morgan (JPM) EMB Hard Currency/Local currency 50-50 is an unmanaged, blended index consisting of 50% JPM Government Bond Index-Emerging Market Global Diversified (GBIEMGD), an index of local-currency bonds with maturities of more than one year issued by EM governments; 25% JPM Emerging Markets Bond Index-Global Diversified (EMBIGD), an index of USD-denominated bonds with maturities of more than one year issued by EM governments; and 25% JPM Corporate Emerging Market Bond Index-Broad Diversified (CEMBIBD), an index of USD-denominated EM corporate bonds. The index(es) are unmanaged; include net reinvested dividends; do not reflect fees or expenses; and are not available for direct investment.

This material is provided for informational purposes without regard to your particular investment needs and shall not be construed as investment or tax advice on which you may rely for your investment decisions. Investors should consult their financial and tax adviser before making investments in order to determine the appropriateness of any investment product discussed herein.

Effective Duration (option-adjusted duration) measures the portfolio's sensitivity of the price (the value of principal) of fixed income securities to changes in interest rates, adjusted to account for embedded options. **Spread Duration** measures a portfolio's sensitivity to price movements (the value of principal) for fixed income securities relative to changes in each security's credit spread (yield difference between a benchmark, typically a treasury yield curve). **Credit Rating Composition** is the portfolio's proportion of investment grade (IG), below investment grade (High Yield; HY) and not rated securities by market value weight determined by Artisan Partners. Not Rated includes unrated positions and derivatives. IG includes cash and equivalents. Artisan utilizes available ratings from Moody's, S&P and Fitch assigned to each relevant position held in the portfolio, taking the middle rating if the security is rated by all three agencies, the lower rating if the security is rated by two of the three, and the sole rating if the security is rated by one of the three agencies. Credit Rating Composition is subject to change and does not ensure the stability or safety of the entire portfolio. Detailed portfolio rating exposures are available upon request. **Yield to Worst (YTW)** is the portfolio's weighted-average lowest potential yield that can be received on a bond without the issuer actually defaulting. **30-Day SEC Yield** is based on a formula specified by the SEC that calculates a fund's hypothetical annualized income, as a percentage of its assets. The unsubsidized yield excludes the effect of fee waivers. This hypothetical yield will differ from the fund's actual experience and as a result, income distributions from the fund may be higher or lower.
