

Artisan Global Unconstrained Fund

QUARTERLY
Fact Sheet

Investor Class: APFPX | Advisor Class: APDPX

As of 31 December 2024

This material must be preceded or accompanied by a current Artisan Partners Funds prospectus. [View a prospectus or summary prospectus.](#)

Investment Process Highlights

The team applies in-depth fundamental research and employs robust operational capabilities across a broad opportunity set to uncover knowledge gaps in global markets. By exploiting knowledge gaps, the team is well positioned to discover idiosyncratic opportunities that provide compelling risk-adjusted return potential.

Organizational Structure

- Flat and collaborative structure
- Portfolio managers and analysts focus on idea generation
- Trading and implementation are embedded within the investment team

Idea Generation Through Broad Investment Universe

- Constantly perform fundamental country research and monitor financial markets
- Country research seeks to understand policy environment and how important policy moments may alter the investment environment
- Corporate analysis includes decomposing yields and examining corporate liquidity and solvency risks
- Integrated environmental, social and governance (ESG) analysis at the country and corporate levels
- Broad spectrum of global markets with investable assets from more than 100 countries across asset classes

Portfolio Implementation

- Investment opportunities analyzed from a risk factor perspective—the forces that drive securities and instruments prices
- Investment team and trading consider which instruments provide optimal risk-adjusted return
- Trading and implementation expands the investment universe by understanding and overcoming investment barriers

Portfolio Details

	APFPX	APDPX
Net Asset Value (NAV)	\$10.23	\$10.23
Inception	31 Mar 2022	31 Mar 2022
30-Day SEC Yield (%)*	5.30/5.91	5.70/6.00
Expense Ratios (% Gross/Net)		
Prospectus 31 May 2024 ^{1,2,3}	9.88/1.88	3.31/1.67
Adjusted 31 May 2024 ^{2,3,4}	9.29/1.24	2.72/1.14
Total Net Assets (Millions)		\$139

*Unsubsidized/subsidized. ¹Includes interest expense and dividend payments for securities sold short. ²Net expenses reflect a contractual expense limitation agreement in effect through 31 Jan 2026. ³See prospectus for further details. ⁴Adjusted expense ratio excludes certain investment expenses such as interest expense from borrowings and repurchase agreements and dividend expenses from short sales.

Portfolio Statistics

Yield to Worst	10.56%
Effective Duration (yrs)	1.04
Spread Duration (yrs)	-2.33
IG/HY/Not Rated Composition (%)	36/50/14
Number of Issuers ¹	173

Source: Artisan Partners. Based on market value of the total portfolio, including cash and cash equivalents. ¹Equals the number of risk positions, defined by the investment team as the number of emerging markets sovereign and corporate issuers to which the portfolio is exposed directly or via derivative instrument (treating hard currency credit and interest rates exposures distinctly), as well as the number of emerging markets currencies to which the portfolio is exposed.

Asset Types (%)

	Long	Short	Net
Sovereign Credit ¹	37.45	-79.68	-42.23
Corporate Credit ¹	12.34	-4.70	7.65
FX Exposure ²	37.44	-40.70	-3.26
Equity ³	6.61	-5.71	0.90

¹Reflects credit positions payable in hard currencies, including notional exposure of derivative positions. ²Reflects aggregate net exposure to currencies other than the US dollar. Market value of derivative positions are included. ³Reflects notional value.

Investment Results (%)

As of 31 December 2024	Average Annual Total Returns						
	QTD	YTD	1 Yr	3 Yr	5 Yr	10 Yr	Inception
Investor Class: APFPX	3.20	10.71	10.71	—	—	—	9.11

Past performance does not guarantee and is not a reliable indicator of future results. Investment returns and principal values will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown. Call 800.344.1770 for current to most recent month-end performance. The performance information shown does not reflect the deduction of a 2% redemption fee on shares held by an investor for 90 days or less and, if reflected, the fee would reduce the performance quoted.

Top 5 Long Currency Exposures—Net (%)

Iceland	5.6
Turkey	5.3
Brazil	2.9
Uzbekistan	2.8
Dominican Republic	2.7
TOTAL	19.3%

Reflects the portfolio's aggregate net exposure to currencies other than the US dollar, based on the market value of positions.

Top 5 Long Interest Rate Exposures by Country (years)

Peru	0.24
Indonesia	0.17
India	0.15
Serbia	0.10
Paraguay	0.09
TOTAL	0.74

Reflects the duration contribution from securities and other instruments issued in local currencies, other than US dollars. Excludes short-term currency forwards and hard currency denominated instruments.

Top 5 Long Credit Exposures—Net (%)

Bahamas	6.4
Iraq	4.1
Colombia	4.0
Benin	2.0
Nigeria	1.8
TOTAL	18.3%

Reflects the country of domicile for aggregated portfolio securities denominated in hard currencies.

Currency Exposures by Region—Net (%)

Asia	-15.5
Developed Markets	-1.5
Eastern Europe	10.4
LATAM	6.6
MENA	-3.2
Sub-Saharan Africa	-0.1
TOTAL	-3.3%

Reflects exposures from positions denominated in regional currencies, other than US dollar exposures. Market value of derivative positions are included.

Credit Exposures by Region (%)

Asia	-7.3
Developed Markets	-11.2
Eastern Europe	0.6
LATAM	-3.6
MENA	-12.1
Sub-Saharan Africa	-1.0
TOTAL	-34.6%

Reflects exposures for regionally domiciled positions denominated in hard currencies, including notional value of related derivatives.

Team Leadership

Portfolio Managers	Years of Investment Experience
Michael A. Cirami, CFA	26
Sarah C. Orvin, CFA	17

Carefully consider the Fund's investment objective, risks and charges and expenses. This and other important information is contained in the Fund's prospectus and summary prospectus, which can be obtained by calling 800.344.1770. Read carefully before investing.

Current and future portfolio holdings are subject to risk. The value of portfolio securities selected by the investment team may rise or fall in response to company, market, economic, political, regulatory or other news, at times greater than the market or benchmark index. A portfolio's environmental, social and governance ("ESG") considerations may limit the investment opportunities available and, as a result, the portfolio may forgo certain investment opportunities and underperform portfolios that do not consider ESG factors. Non-diversified portfolios may invest larger portions of assets in securities of a smaller number of issuers and performance of a single issuer may have a greater impact to the portfolio's returns. International investments involve special risks, including currency fluctuation, lower liquidity, different accounting methods and economic and political systems, and higher transaction costs. These risks typically are greater in emerging and less developed markets, including frontier markets, and include new and rapidly changing political and economic structures, which may cause instability; underdeveloped securities markets; and higher likelihood of high levels of inflation, deflation or currency devaluations. Fixed income securities carry interest rate risk and credit risk for both the issuer and counterparty and investors may lose principal value. In general, when interest rates rise, fixed income values fall. High yield securities (junk bonds) are speculative, experience greater price volatility and have a higher degree of credit and liquidity risk than bonds with a higher credit rating. Use of derivatives may create investment leverage and increase the likelihood of volatility and risk of loss in excess of the amount invested.

The portfolio exposures presented exclude US Treasuries, US dollars and US dollar-denominated derivatives and cash equivalents, unless otherwise noted. In aggregate, these instruments make up a material portion of the portfolio's exposures and may be impactful to the portfolio's return, but are typically utilized for liquidity management and reflect negative exposures due to currency offsets when funding non-US positions. Hard currencies are defined by the investment team to include currencies of developed market countries, including US dollars, euros, British pounds and Japanese yen, among others.

Unless otherwise indicated: the portfolio data and performance source is Artisan Partners; all information in this report includes all classes of shares, except performance, SEC Yield and expense ratio information; and information is as of the date shown in the upper right hand corner, is subject to change and may vary from the official books and records of the Fund. Where applicable, portfolio statistics include accrued interest, and exposure percentages are based on the Fund's total net assets. Totals may not sum to 100% due to rounding, derivative exposures, unsettled transactions and other factors.

Notional value adjusts for derivatives' exposures to the market value of a contract's underlying security, rather than the market value of the contract itself, and represents an approximation of the portfolio's economic and risk exposures at a point in time. Delta measures the sensitivity of a derivative contract to changes in price of its underlying security; the derivatives contract's value may be overstated or understated without delta-adjustment.

The ICE BofA 3-Month U.S. Treasury Bill Index is an unmanaged index that comprises a single U.S. Treasury issue with approximately three months to final maturity, purchased at the beginning of each month and held for one full month. The index(es) are unmanaged; include net reinvested dividends; do not reflect fees or expenses; and are not available for direct investment.

The Morningstar Medalist Rating™ is the summary expression of Morningstar's forward-looking analysis of investment strategies based on a rating scale of Gold, Silver, Bronze, Neutral, and Negative. Medalist Ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a risk-adjusted basis over time. Investment products are evaluated on three key pillars (People, Parent, and Process) which, when coupled with a fee assessment, forms the basis for Morningstar's conviction in those products' investment merits and determines the rating they're assigned. Pillars may be evaluated via an analyst's qualitative assessment or using algorithmic techniques, taking the form of Low, Below Average, Average, Above Average, and High. Products are sorted by their expected performance into rating groups defined by their Morningstar Category and their active or passive status. When analysts directly cover a product, they assign the three pillar ratings based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. When the vehicles are covered either indirectly by analysts or by algorithm, the ratings are assigned monthly.

Ratings involve risks and uncertainties and should not be used as the sole basis in evaluating an investment, nor be considered an offer or solicitation to buy or sell the investment. For information about Morningstar ratings and their methodology, go to global.morningstar.com/managerdisclosures/.

Investors should consult their financial and tax adviser before making investments in order to determine the appropriateness of any investment product discussed herein.

Effective Duration (option-adjusted duration) measures the portfolio's sensitivity of the price (the value of principal) of fixed income securities to changes in interest rates, adjusted to account for embedded options. **Spread Duration** measures a portfolio's sensitivity to price movements (the value of principal) for fixed income securities relative to changes in each security's credit spread (yield difference between a benchmark, typically a treasury yield curve). **Credit Rating Composition** is the portfolio's proportion of investment grade (IG), below investment grade (High Yield; HY) and not rated securities by market value weight determined by Artisan Partners. Not Rated includes unrated positions and derivatives. IG includes cash and equivalents. Artisan utilizes available ratings from Moody's, S&P and Fitch assigned to each relevant position held in the portfolio, taking the middle rating if the security is rated by all three agencies, the lower rating if the security is rated by two of the three, and the sole rating if the security is rated by one of the three agencies. Credit Rating Composition is subject to change and does not ensure the stability or safety of the entire portfolio. Detailed portfolio rating exposures are available upon request. **Yield to Worst (YTW)** is the portfolio's weighted-average lowest potential yield that can be received on a bond without the issuer actually defaulting. **30-Day SEC Yield** is based on a formula specified by the SEC that calculates a fund's hypothetical annualized income, as a percentage of its assets. The unsubsidized yield excludes the effect of fee waivers. This hypothetical yield will differ from the fund's actual experience and as a result, income distributions from the fund may be higher or lower.
