Net Exposure Weight represents the portfolio's exposures based on the economic value of investments (including delta-adjusting options exposures). Delta-adjusted options exposure is a measure of the market exposure created by the options and accounts for the sensitivity of options to changes in price of the underlying security. In comparison, measuring the exposure of an option at the market value of the option or notional value can understate or overstate, respectively, the economic exposure and risk. This estimate of portfolio exposure is only an approximation of the portfolio at a point in time.

Portfolio holdings are displayed in the context of marketing the fund shares and not the marketing of underlying portfolio securities. Portfolio holdings are subject to change without notice and are not intended as recommendations of individual securities. The information contained herein may vary from the official books and records of the Fund. Security names may not represent the official legal corporate name. Please refer to the Fund's most recent Annual Report for an audited portfolio holdings list. Information in this report includes all classes of shares. Delta-adjusted portfolio holdings excludes cash and cash equivalents. To view market-value based holdings, which includes cash and cash equivalents, visit: <https://www.artisanpartners.com/content/dam/documents/holdings/vfund/2024/3q/Focus-Holdings-MV-3Q24-vFund.pdf>
