Commentary

Emerging markets (EM) equities showed resilience amid some market volatility in August. Escalating geopolitical tensions in the Middle East and uncertainty over potential US central bank rate cuts weighed on investor sentiment. India has been the MSCI Emerging Markets Index's main contributor QTD, while Korea and Taiwan have been the benchmark's largest detractors. Our portfolio has outperformed the benchmark QTD.

Our top relative contributors QTD include MercadoLibre and E Ink Holdings. Shares of MercadoLibre, the leading e-commerce platform in Latin America, performed well in August, fueled by robust revenue growth. The company has been expanding across Latin America, fortifying its competitive advantage in both e-commerce and fintech. We have long believed in the company's diversified growth strategy and its prospects for continued success.

E Ink is a Taiwan-based producer of e-paper technology used in e-readers, such as Amazon's Kindle, and electronic shelf label (ESL) systems used to display pricing on retail shelves. The company has continued to outperform, driven in part by Walmart's implementation of E Ink's ESL technology in its stores. Additionally, the company has adopted new technology into its full-color products, supporting faster speeds and lower power consumption. We believe this advancement expands the capabilities of E Ink's e-paper technology and will contribute to the widespread adoption of electronic paper.

Our primary relative detractors QTD include Zhuzhou CRRC Times Electric and Estun Automation. Zhuzhou provides and integrates train-borne electrical systems for China's railway industry. The company's strong stock performance so far this year was interrupted in August by what appeared to be investor profit-taking. Nonetheless, we believe company fundamentals remain strong and believe Zhuzhou will benefit from the continued growth of its legacy train business and new products segments.

Estun is a leading domestic Chinese robot producer. China's industrial production has declined this quarter, dampening investor sentiment and adding to signs of economic slowdown. However, the Chinese government recently outlined efforts to update industrial equipment across China's manufacturing sector to bolster economic growth. We are optimistic that this policy will aid in economic recovery, and we believe Estun is positioned to capitalize on China's ongoing industrial expansion.

Volatility is to be expected in emerging markets, and it can be extreme at times—a natural part of what we believe can be a superior growth opportunity over longer periods. We maintain our disciplined process and closely monitor positions—including engagement with management teams—to adjust valuations and position size as we believe appropriate.

Source: Artisan Partners/MSCI. Returns for periods less than one year are not annualized. Class inception: Investor (2 June 2008); Advisor (27 April 2022). For the period prior to inception, Advisor Class performance is the Investor Class's return for that period ("Linked Performance"). Linked Performance has not been restated to reflect expenses of the Advisor Class and the share class's returns during that period would be different if such expenses were reflected.

Past performance does not guarantee and is not a reliable indicator of future results. Investment returns and principal values will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown. Call 800.344.1770 for current to most recent month-end performance. Performance may reflect agreements to limit a Fund's expenses, which would reduce performance if not in effect.

Carefully consider the Fund's investment objective, risks and charges and expenses. This and other important information is contained in the Fund's prospectus and summary prospectus, which can be obtained by calling 800.344.1770. Read carefully before investing.

Current and future portfolio holdings are subject to risk. The value of portfolio securities selected by the investment team may rise or fall in response to company, market, economic, political, regulatory or other news, at times greater than the market or benchmark index. A portfolio's environmental, social and governance ("ESG") considerations may limit the investment opportunities available and, as a result, the portfolio may forgo certain investment opportunities and underperform portfolios that do not consider ESG factors. Investments in which the team has determined to have sustainable growth characteristics may underperform other securities and may not achieve their sustainable growth potential. Non-diversified portfolios may invest larger portions of assets in securities of a smaller number of issuers and performance of a single issuer may have a greater impact to the portfolio's returns. International investments involve special risks, including currency fluctuation, lower liquidity, different accounting methods and economic and political systems, and higher transaction costs. These risks typically are greater in emerging and less developed markets, including frontier markets. Such risks include new and rapidly changing political and economic structures, which may cause instability; underdeveloped securities markets; and higher likelihood of high levels of inflation, deflation or currency devaluations. Securities of small- and medium-sized companies tend to have a shorter history of operations, be more volatile and less liquid and may have underperformed securities of large companies during some periods.

MSCI Emerging Markets Index measures the performance of emerging markets. The index(es) are unmanaged; include net reinvested dividends; do not reflect fees or expenses; and are not available for direct investment.

For the purpose of determining the Fund's holdings, securities of the same issuer are aggregated to determine the weight in the Fund. The discussion of portfolio holdings does not constitute a recommendation of any individual security. These holdings comprise the following percentages of the Fund's total net assets as of 31 Aug 2024: Estun Automation Co Ltd 1.5%; Zhuzhou CRRC Times Electric Co Ltd 2.3%. As of 3 Mar 2022, Russian holdings are valued at zero. Securities named in the Commentary, but not listed as a Top Ten Holding or not listed here are not held in the Fund as of the date of this report. The portfolio managers' views and portfolio holdings are subject to change and the Fund disclaims any obligation to advise investors of such changes.

Unless otherwise indicated, all information in this report includes all classes of shares, except performance and expense ratio information, and is as of the date shown in the upper right hand corner. Totals may not sum due to rounding.
