Commentary

The MSCI AC World Index returned 4.1% in May, bringing the QTD total to 0.6%. Markets rebounded in May after a challenging April as investors breathed a sigh of relief that US economic activity was not running too hot to allow for easing inflationary pressures. Early in the month, yields on US Treasuries decreased after April nonfarm payrolls grew by 175,000, well below the 240,000 forecast. Furthermore, after multiple months of inflation readings that were ahead of expectations, consumer prices rose 0.3% in April, in line with the forecast.

Our portfolio underperformed the MSCI AC World Index in May and is trailing for the QTD period. Among our top detractors were Veeva Systems and Atlassian. Veeva Systems has the dominant CRM platform for pharmaceutical sales and marketing organizations, and it is replicating that success with the rollout of numerous other modules focused on pharmaceutical R&D departments. Shares sold off after management slightly lowered its 2024 forward guidance due to macroeconomic uncertainty weighing on small- and medium-sized businesses and disruption in large enterprises that are currently focused on artificial intelligence plans. We continue to view Veeva as a premier franchise whose growth can reaccelerate over time as its clinical software and data products reach mass adoption by the pharmaceutical industry. However, without a visible 2024 catalyst, we concluded that our position size was too large and trimmed it.

Atlassian reported strong earnings results. However, growth was driven by its Data Center segment (enterprise-focused) rather than Cloud (small- and medium-sized company-focused). These results have reinforced investor concerns around weakness among small- and medium-sized companies, where pressures persist in paid seat expansions and shares experienced pressure. We have trimmed the position given elevated uncertainty but remain invested and are excited about its opportunity to leverage generative AI to drive accelerated cloud revenue growth.

Among our top contributors were Boston Scientific and Taiwan Semiconductor (TSMC). Boston Scientific is a leading global developer, manufacturer and marketer of medical devices used in minimally invasive procedures across five businesses: cardiology, peripheral, medical-surgical, urology and neuromodulation. Shares continued their year-to-date outperformance in Q2 after the company reported strong earnings results, including 13% revenue growth. More specifically, we were encouraged by the 18% growth in cardiology, which was driven by an outstanding US launch of the recently approved FARAPULSE system. We believe Boston Scientific is well positioned for further revenue acceleration, margin expansion and continued business development activity.

TSMC holds a leading market position in the global semiconductor foundry market (more than 80% in leading-edge chips), enabling customers to advance their technologies with its innovation, execution, support and economies of scale. We believe the company is transitioning to a period of accelerating growth due to a diverse array of catalysts linked to AI, the Internet of things and automation. Recent earnings results were thesis affirming as top-line growth exceeded expectations, and management raised forward guidance citing AI-related strength.

Source: Artisan Partners/MSCI. Returns for periods less than one year are not annualized. Class inception: Investor (22 September 2008); Advisor (1 April 2015). For the period prior to inception, Advisor Class performance is the Investor Class's return for that period ("Linked Performance"). Linked Performance has not been restated to reflect expenses of the Advisor Class and the share class's returns during that period would be different if such expenses were reflected.

Past performance does not guarantee and is not a reliable indicator of future results. Investment returns and principal values will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown. Call 800.344.1770 for current to most recent month-end performance. Performance may reflect agreements to limit a Fund's expenses, which would reduce performance if not in effect.

Carefully consider the Fund's investment objective, risks and charges and expenses. This and other important information is contained in the Fund's prospectus and summary prospectus, which can be obtained by calling 800.344.1770. Read carefully before investing.

Current and future portfolio holdings are subject to risk. The value of portfolio securities selected by the investment team may rise or fall in response to company, market, economic, political, regulatory or other news, at times greater than the market or benchmark index. A portfolio's environmental, social and governance ("ESG") considerations may limit the investment opportunities available and, as a result, the portfolio may forgo certain investment opportunities and underperform portfolios that do not consider ESG factors. International investments involve special risks, including currency fluctuation, lower liquidity, different accounting methods and economic and political systems, and higher transaction costs. These risks typically are greater in emerging and less developed markets, including frontier markets. Securities of small- and medium-sized companies tend to have a shorter history of operations, be more volatile and less liquid and may have underperformed securities of large companies during some periods. Growth securities may underperform other asset types during a given period.

MSCI All Country World Index measures the performance of developed and emerging markets. The index(es) are unmanaged; include net reinvested dividends; do not reflect fees or expenses; and are not available for direct investment.

For the purpose of determining the Fund's holdings, securities of the same issuer are aggregated to determine the weight in the Fund. The discussion of portfolio holdings does not constitute a recommendation of any individual security. These holdings comprise the following percentages of the Fund's total net assets as of 31 May 2024: Atlassian Corp 2.0%; Veeva Systems Inc 1.6%. Securities named in the Commentary, but not listed as a Top Ten Holding or not listed here are not held in the Fund as of the date of this report. The portfolio managers' views and portfolio holdings are subject to change and the Fund disclaims any obligation to advise investors of such changes.

Unless otherwise indicated, all information in this report includes all classes of shares, except performance and expense ratio information, and is as of the date shown in the upper right hand corner. Totals may not sum due to rounding.

Country exposure percentages reflect country designations as classified by MSCI as of the date shown. Securities not classified by MSCI reflect country designations as of the date the report was generated. Sector exposure percentages reflect sector designations as currently classified by GICS.

Our capital allocation process is designed to build position size according to our conviction. Portfolio holdings develop through three stages: GardenSM, CropSM and HarvestSM. GardenSM investments are situations where we believe we are right, but there is not clear evidence that the profit cycle has taken hold, so positions are small. CropSM investments are holdings where we have gained conviction in the company's profit cycle, so positions are larger. HarvestSM investments are holdings that have exceeded our estimate of intrinsic value or holdings where there is a deceleration in the company's profit cycle. HarvestSM investments are generally being reduced or sold from the portfolios.
